HisPolEnt Quiz

by Aksh, Faizan, & Raghav

Question 1

X, the aging patriarch of his political party, recently witnessed the unraveling of an organization he had founded 24 years ago. This situation is eerily reminiscent of past events. In 1999, X and Tariq Anwar established their party after being expelled from another party, which was led by its then president, Y. Their expulsion followed a challenge to Y's leadership. However, within months of forming their new party, they chose to ally with the party still under Y's leadership. This alliance helped the party form the state government with X’s support. It is both ironic and unexpected that despite their initial conflict and expulsion, X’s new party ended up collaborating with the very party they had once opposed.

ID Y

Answer

Y - Sonia Gandhi

Question 2

The Secret Service was founded in 1865, ironically on the same day Abraham Lincoln was assassinated. Despite that coincidence, the agency's original mission was not to protect the president but rather to combat the era's rampant money counterfeiting problem. In the intervening years, one of the Secret Service's most effective units was fully spun off, becoming the Federal Bureau of Investigation. It was in 1901 that they were officially assigned the primary task of protecting presidents following the incident (X) that took place the same year. Since then, although the agency was officially given the job of safeguarding U.S. presidents, only a single incident (Y) has blotted the Secret Service's record.

Identify the events X and Y.

Answer

The U.S. Presidents assassinations..

- Assassination of William McKinley
- Assassination of John F. Kennedy

Question 3

The Middle East, and Iraq in particular, provides the backdrop for the story in this movie. It was originally planned for the film to be set in Iraq prior to the start of the First Gulf War in the early 1990s, but the directors ultimately decided to centre the plot around a fictional city. This imaginary city has a unique bond with a globally renowned Indian city, and the directors selected this location since the historic sites in this city and Iraq share a similar architectural style.

ID the movie and the name of the fictional city.

Answer

Movie- Aladdin

City- Agrabah

Question 4

A software engineer at the Soviet Academy of Sciences in Moscow was tasked with testing a new type of computer, the Electronika 60. To do so, he wrote a simple game which would help assess how powerful the computer was – and provide a bit of fun. soon The game became popular among anyone who had access to early computers and quickly spread through Moscow via word of mouth. Over the years, the success of the game challenged the Soviet government's control over entertainment and technology, making it a remarkable testament to the power of creativity and innovation in the face of oppression. This remarkable story was adapted into a movie last year.

ID the movie/game

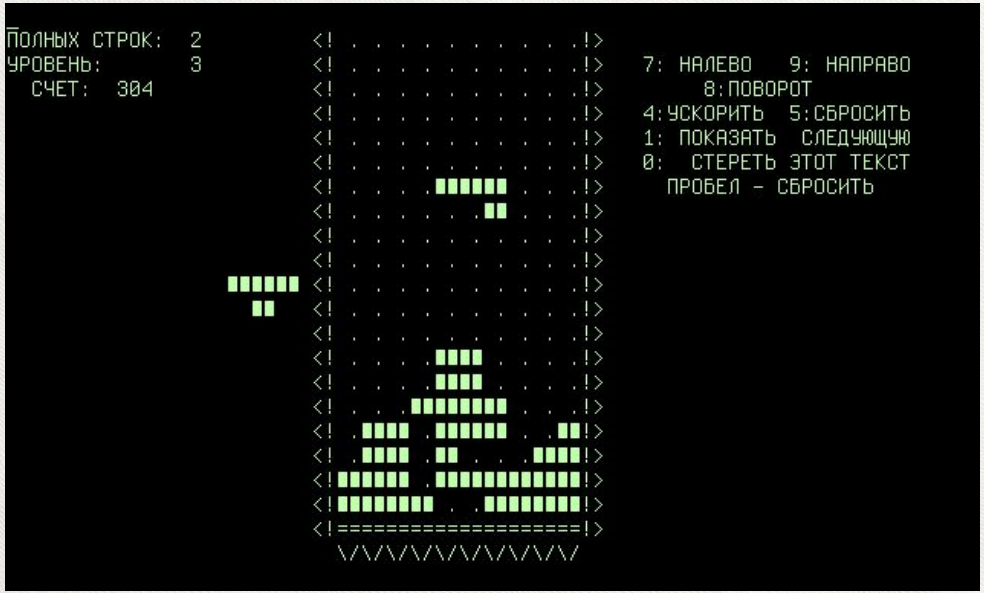

Question 4

Answer

TETRIS

Question 5

A fresh wave of metal, known as X, began its musical journey during early 2010s in Japan. Its style has brought something unseen to the metal scene—a uniqueness that gathers fans of varied metal genres and subgenres to mosh. The lyrics tend to differ from the typical, overly covered topics in metal. The bands prefer to convey empowering and positive lyrics focusing on love rather than death, on life's pleasure rather than pain, and on social problems rather than murder. One aspect specific to this sub-genre is its mandatory Japanese aesthetic. The singers wear cute, girly school or maid uniforms during their performances. This new subgenre of metal had no difficulty finding its own spot in the music world.

ID the sub-genre.

Answer

Idol Metal (or Kawaii Metal)

Question 6

“When you’re making a ____(5) movie, you have to make sure that you’re telling a story that’s fun, imaginative, and, above all else, truthful,” Mann tells The National. “And so that’s where I started. I had to go somewhere really emotional, so I went back to my old birthday photos.”

Mann had just been tasked by Pete Docter, the director of the original 2015 film and now head of the studios, to come up with a worthy sequel to his modern classic film X. He told the Academy of Motion Picture Arts and Sciences that the inspiration came after looking at childhood birthday photos of himself. He noticed he had "the biggest smile" on his face during his 5th birthday; however, on his 13th birthday, his smile had "diminished." "I was just sitting there staring at the cake. I looked miserable, and it was such a contrast from when I was 5. I was like, 'What happened?!'" Mann said.

ID X

Answer

Inside Out

Question 7

There are no books or stories about X; everything seems to have been kept secret by the Incas. No one knows its true name, and it is not mentioned in any old records. X is a mystery that still fascinates many people. It is believed that its original name was Patallacta, derived from the Quechua words "Pata" (high or step) and "Ilacta" (town or city). Together, they mean "town of steps" or "high town." It remained relatively unknown to the outside world until the early 20th century. Local Quechua farmers knew about the site, but it gained widespread international fame in 2007, becoming an even more important landmark worldwide.

ID X and the reason for the widespread fame in 2007

Answer

X - Machu Picchu
it was selected as one of the New Seven Wonders of the World in a global poll conducted by the New7Wonders Foundation done in 2007

07.07.2007
LISBON
OFFICIAL DECLARATION OF
THE NEW 7 WONDERS®
OF THE WORLD

Question 8

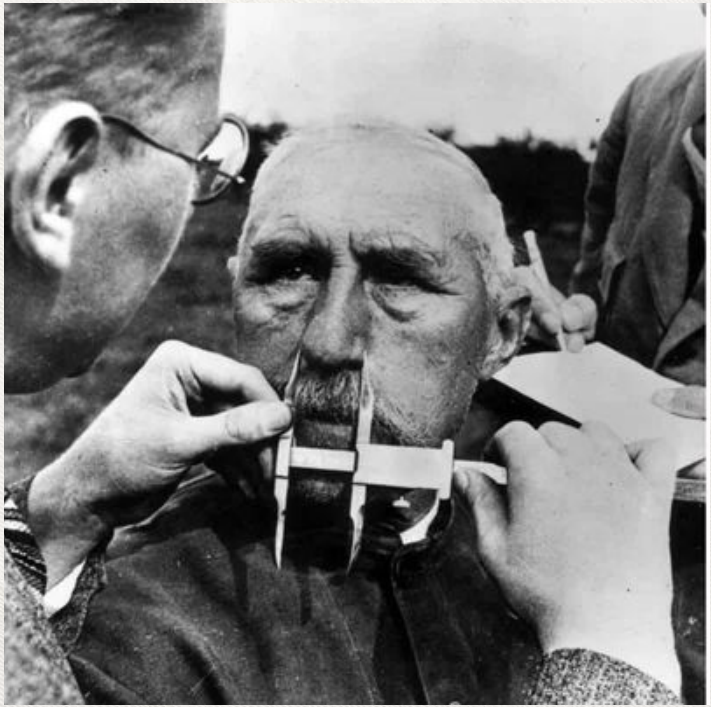

Nazi propaganda was heavily taught in schools, and lessons on identifying Jews were included in the curriculum. The Nazis created incredibly racial and absurd methods of identifying Jews based primarily on **appearance and facial traits**. For the same purpose, records from the church and synagogue were also employed. During this time, a children's book published by Nazi propagandist Julius Streicher that was taught in schools caused Jewish people to become afraid of the number six.

What made Jews fearful of the number six?

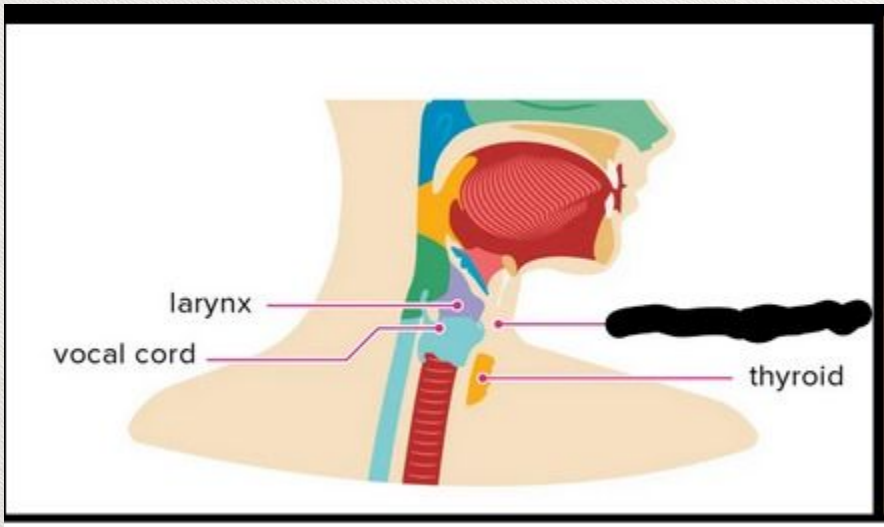

Answer

Hitler believed Jews had crooked(hooked) noses, resembled number six

Question 9

ID the name and the lead of this famous OTT show

Answer

Actress- Jenna Ortega
Show- Wednesday

Question 10

Though the X has ancient roots, the X Y itself is a relatively modern affair. “There wasn’t an X Y, in the way that we know it, for the ancient games (though) there might have been an altar burning,” said sports historian and author of “The Story of the Olympic X,” Philip Barker, in a video interview.

In fact, X Y first took place in Nazi Germany during the 1936 Summer Games. Conceived by the Berlin Olympics’ chief organizer Carl Diem, the event X Y was first designed to showcase Nazi Germany’s growing power, and a young, blonde-haired runner, Fritz Schilgen, was selected as the final bearer for his Aryan appearance. Footage of the event was also highly orchestrated, with parts of the Y restaged and re-shot after the Games for the 1938 propaganda film “Olympia.” Over time, the X Y’s dark origin story has faded from memory as each new host city makes it their own.

ID X Y.

Answer

X Y - Torch Relay

Question 11

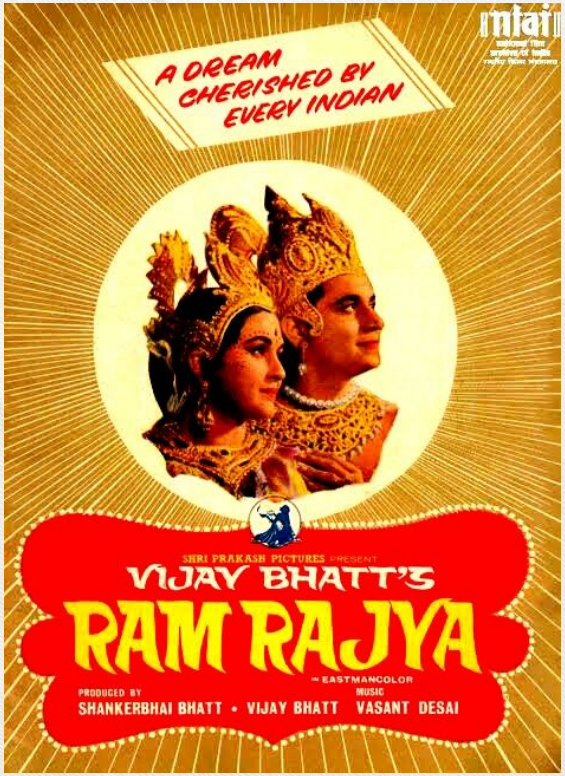

Numerous television series and films have been based on the Ramayana. **Ram Rajya** was one such film, released in 1943 during the colonial era. It received widespread attention throughout India and became extremely popular among the general public. Since the movie's title was associated with the independence movement, it was also the driving force behind the crowds' turnout. There is something exceptional about this movie in terms of its **viewers**, which makes it absolutely unique.

What makes this movie so unique?

Answer

It was the first and last Indian movie watched by Mahatma Gandhi.

Question 12

Yevgeny Khaldei captured the iconic image of a Soviet soldier hoisting the Soviet flag over the German Reichstag, which was sent to Moscow. When the image reached Moscow, the Soviets began modifying the contrast, shadows, and sky to make the photograph more dramatic. Then they focused on the soldier, and they noticed something strange and odd. During World War II, though it was highly common practice among the soldiers, the Soviets were concerned that it would severely harm the image of the Soviet Union and Red Army. They altered that section before publishing it.

What adjustment was done to the original photograph?

(image on next slide)

Answer

There were wristwatches on both wrists of the soldier in the photograph.

Question 13

The phrase X became immensely popular in America during World War I, giving Americans optimism that the war was worthy and would ensure that the same thing did not happen again, effectively ending every conflict. This phrase is a slightly modified version of the title of a book written by H.G. Wells and published after the outbreak of war.

By 1918, this phrase had become widespread in Europe, and it was regarded as a symbol of hope for a better tomorrow. However, this saying proved to be wrong because of the Second World War, which was significantly more devastating than the previous one.

What was the phrase (6 words)?

Answer

The War to end all wars

Question 14

Following the end of World War II, the guilt clause of X held Germany accountable for the war and required it to pay reparations for the losses incurred by the Allied forces. These agreements left Germany in **massive debt**, which increased throughout the Great Depression. The majority of historians agree that Germany's economic problems were the primary factor for Hitler's rise to power in Germany. In 2010, this topic received a lot of attention. Historians and economists debated whether or not what happened to Germany was right, and many spoke about how colonised countries were being plundered economically and who should be held accountable.

Why were all these arguments held?

Answer

The final installment of Germany's debt for WW1 reparations was paid in 2010.

Question 15

The entrance to hell in Turkmenistan is thought to be one of the most devastating man-made disasters. When Soviet scientists and engineers drilled these locations in the 1960s in search of crude oil, methane gas was released, and the engineers assumed it would burn rapidly, underestimating the volume of methane gas. This had terrible consequences on the Soviet Union's environment and economy. This incident is supposed to have influenced X to take a decision which impacted the economy and environment in the Middle East very badly in the early 1990s. However, X also used the same tactic in the early 2000s, but for a completely different reason.

What was the decision taken in the early 2000s?

Answer

Iraqi army set fire to its oil wells to stop the US troops from advancing forward

Thank You !

See you all in campus!
